

Senior Software Engineer

INTERVIEWING NOW FOR START IN 1 MONTH. VISA ORGANISED.

Location: Nicosia, Cyprus, European Union.

The role:

We are looking for an ambitious and self-driven Senior Developer to join our team in Cyprus (EU) as we launch a disruptive low code software development platform, empowering millions to create custom applications to solve problems and streamline processes, without the knowledge of code.

This role is fast paced and requires someone with strong levels of initiative and a creative mindset. You will be working with the ground-breaking technology to implement visual elements for users designing their applications, and facilitate smooth back-end logic creation for users building processes in their applications. With autonomy, training and creative input, you will have the chance to advance and grow your career.

The stack: Angular on the front end and NodeJS and PostgreSQL on the back end.

Salary: competitive with Cyprus (EU).

Key aspects of the role:

- Collaborate with front end and back end developers to develop user centric features
- Build and integrate support for mobile apps and external databases
- Build integrations with external platforms
- Responsive Interface integration
- Develop major platform components
- Analyse critical approaches for effective problem solving
- Add value to the team with ideas for new functions and capabilities.

Required skills:

You need to be proficient with at least one of the following:

- JavaScript
- Angular
- Vue
- React
- Node JS

Person specification:

- Detail-driven, numerate and excellent problem-solving abilities.
- Hands on strong experience in front end or back end development.
- Ambitious and self-driven to solve complex problems.
- A grounding in Computer Science, including algorithms, data structures, operating systems, programming languages.
- Advanced quantitative analytical abilities.

- Experience delivering complex projects in partnership with remote colleagues.
- Strong sense of ownership and a passion to deliver a world-class user experience for the low code platform.
- Critical time management skills.
- Be able to anticipate bottlenecks and escalate as needed.
- Balance business needs versus technical constraints.

Our core values:

We are seeking a person with a positive, unstoppable, winning attitude who is an opportunity maker and thrives on being challenged. Being part of a start up team, you need to be committed, flexible, dynamic and hungry to take on responsibility.

Our culture comprises of people who are:

Tenacious
Intellectual
Loyal
Hardworking
Dedicated
Resilient to adversity
Innovative / Entrepreneurial
Humble in nature
Hungry to learn and grow
Naturally curious
Team players

A handful of our benefits:

Creatingly gives people the opportunity to be able to solve complex problems and build a low code platform that makes a difference to people globally, by making software development accessible to the masses. You will be transforming industries, and radically transform the status quo of low code software development. At Creatingly we are changing the world and you will be part of this movement.

- Facilitation of your relocation to Cyprus.
- Pathway to European citizenship.
- You will have the opportunity to apply ingenuity to solving complex problems and utilise cutting edge tools and methodologies.

To Apply:

- 1- Register to the waiting list to try the platform here: <https://creatingly.tech>
