(More details on next page)

→ JustTech

Front end Developer | Mar 2019 - present

Hypoteket *Frontend Developer*

In short:

Implementing views and frontend for Hypoteket.com - Mostly worked on admin panel with vue.

PlayReplay & GTG *Frontend Developer*

In short:

Implementing views and frontend for a video streaming system - created for tennis academy *Good to Great* - by Swedish tennis professionals Jonas Björkman/Nicklas Kulti/Magnus Norman

Stack:

React.js, Redux, GraphQL, Vue.js, Jest, Gatsby.js, Node.js, Express, FireBase

→ IranTIP

Front end Developer | May 2018 - February 2019

In short:

[IranTIP](#) is a platform for connecting Iranian companies to investors around the world. Built the complete front end structure of the website with a versatile and competent team of four developers. Setup some tools with gitlab instance CI/CD. We used test for both frontend and backend projects. Our backend project was running on dockerized containers.

Stack:

React, Mobx, SCSS, Formik, Typescript, TSLint, Python, Django, Jest, Docker, Git, Scrum.

→ Cotint

Front end Developer | February 2018 - May 2018

In short:

[Cotint](#) is a company that builds a lot of sites. I worked there as a frontend developer specially for Tunnelmal project. It was a large scale e-commerce website inspired by amazon. It was one of my best experiences because we were using new technologies and new frameworks and we had a lot of difficult challenges

Stack:

Html, CSS, jQuery, JSTree, Git

→ **AndishehPardazParsPouya(Raypo)**

Front end Developer | December 2017 - February 2018

In short:

[Raypo](#) is an integrated loyalty system that wants to gather loyal customer in one platform. I was working as a frontend developer and they used angular for their admin panel and their site therefore I learned angular to develop related panels.

Stack:

Angular 4, MaterializeUI, ng2, Git

→ **BaharsamaneShargh**

Front end Developer | January 2017 - December 2017

In short:

[BaharSamaneh](#) is an ISP that provides internet. I worked there as a frontend developer specially for the company's CRM. It was a large scale CRM under load from thousands of customers. We had difficult challenges.

Stack:

Html, CSS, jQuery, Git
